

Growing Dome Shipment Details

STANDARD SHIPMENT

For the 15' through 26' Growing Domes we will always order a lift gate but cannot guarantee that all destination terminals will have one. The 33' and 42' cannot be offloaded with a lift gate.

If the truck comes to your property without a lift gate or you ordered a 33' or a 42' you have two options:

1. Use your own or rent/borrow heavy equipment with a forklift attachment
2. Hand offload the Growing Dome Kit yourself

To hand offload equipment, know that the items inside the crates will be bundled (see photos and video below), so you'll have less pieces to unload. The back of the truck will not have a ramp and it is tall, so you will need at least two people to unload, one in the truck and one on the ground. An additional person or two to help stack items may be useful. We have a rough estimate of 2-3 hours to offload a 26' or 33' Growing Dome kit, and 3-4 hours for a 42' kit. Not all drivers are willing to wait while you hand offload the truck, so when the driver calls you to let you know he's on his way we recommend you let him know then that you'll need the extra time.

We will be able to give you an approximate transit time and we will request a 24 hour call ahead to you from the driver. We do not have the ability to set up a specific day or time for your delivery. This is up to the shipping carrier. You will be responsible for coordinating the timing of the delivery with the driver to match when you've rented the equipment.

Please let us know in advance if your location is difficult to access (narrow driveway, tight turns on driveway or road, etc.). The driver can decline the delivery if he/she feels the truck will not make the trip. If we know about the restrictions on access to your location, we can work to find another solution for you.

When you receive the crates, please check them for any damage, note this on the Bill of Lading, and notify Growing Spaces right away.

PRIORITY SHIPMENT

For an additional fee we can schedule your shipment with a carrier that does not switch the crates between trucks and that guarantees a lift gate for sizes 26' and under. Ask us for more details.
