

## Aquaponics Links and Resources

Growing Spaces is providing this list purely as a resource. Our 26 years of experience pertains to gardening in raised soil beds and in raising ornamental aquatic plants and fish. Aquaponics is by no means a new growing method, but there is a new modern resurgence in this field. There are not many companies out there that sell complete aquaponics kits, but there are a few, and these systems do come with a premium. Most aquaponic systems are custom built based on each individual's needs and goals. There are industry guidelines and 'rules of thumb' that allow individuals to customize their system with confidence. If you are new to aquaponics and have designed your own system, or are purchasing a pre-fabricated system, we are glad to offer our feedback on how the system might work in the Growing Dome, but we are by no means experts in this field. This resource does, however, include many experts in the field of aquaponic agriculture.
