

Summer 2019 Internship Opportunities

Growing Spaces has internship opportunities for enthusiastic and motivated individuals with a passion for healthy living and helping customers succeed in growing their dream gardens.

Sales and Marketing opportunities

- develop new and innovative marketing strategies through a variety of digital and traditional mediums (social media, web site, gardening community forums, print)
- create amazing marketing content such as videos and photography of our customers
- learn StoryBrand marketing and sales techniques, and how they apply to Growing Spaces
- organic gardening

Engineering and Design opportunities

- create 3D models of Growing Dome, both of existing design and potential new designs
- create dimensioned and tolerance 2D drawings of individual components for fabrication
- structural engineering analysis and design recommendations
- thermodynamic analysis and design recommendations

Requirements

- must have excellent, professional communication skills with approachable and relatable demeanor
- willingness to learn and eager to seek knowledge from internal and industry mentors
- professional appearance and ability to build positive relationships in the office and with clients/customers
- ability to work independently as well as on team assignments
- strong work ethic, positive attitude, team-player

Based in Pagosa Springs, Growing Spaces has been enabling gardeners, communities and businesses to grow fresh, healthy organic food year-round for 30 years. We design, manufacture and install geodesic dome greenhouse kits and have thousands installed in Colorado, all 50 states and 14 countries.

Positions available in Pagosa Springs and Denver area.

Send your resume to employment@growingspaces.com or go online to print our application from our website, located under the "contact us" tab at www.growingspaces.com
